

HADRONIC JOURNAL

Volume 1, Number 2, 1978

Contents

- G. SEGRE and H. A. WELDON**, University of Pennsylvania, Department of Physics, Philadelphia, Pennsylvania 19174,
A grand unified model with calculable masses 424.
- F. ZIRILLI**, Harvard University, Lyman Laboratory of Physics, Cambridge, Massachusetts 02138,
An approximation method of the Hartree-Fock approximation to the first eigenvalue of an N-electrons Hamiltonian 453.
- A. O. BARUT**, University of Colorado, Department of Physics, Boulder, Colorado 80309,
Meson spectroscopy based on proper oscillations of nonlinear fields - An equivalence theorem 458.
- E. ENGELS**, Rijksuniversiteit Gent, Instituut voor Theoretische Mechanica, B-9000 Gent, Belgium
A method for the computation of a Lagrangian within the context of the Inverse Problem of Newtonian Mechanics 465.
- C. H. WOO**, University of Maryland, Department of Physics and Astronomy, College, Park, Maryland 20742,
P and T conservation in the presence of instantons 470.
- P. N. DOBSON, Jr., S. PAKVASA and S. F. TUAN**, University of Hawaii at Manoa, Department of Physics and Astronomy, Honolulu, Hawaii 96822,
SU(3) symmetry breaking in the decays of baryons 476.
- A. P. CONTOGOURIS and S. PAPADOPOULOS**, McGill University, Department of Physics, Montreal, Quebec, Canada,
Quantum chromodynamics predictions for muon pair production at zero and nonzero rapidities 504.
- Cl. GEORGE, F. HENIN, F. MAYNÉ and I. PRIGOGINE**, Université Libre de Bruxelles, Faculté des Sciences, Campus Plaine, C. P. 231, B-1050 Brussels, Belgium,
New quantum rules for dissipative systems 520.
- R. M. SANTILLI**, Harvard University, Lyman Laboratory of Physics, Cambridge, Massachusetts 02138,
Need of subjecting to an experimental verification the validity within a hadron of Einstein's special relativity and Pauli's exclusion principle 574.

(327 pages, available as HADRONIC JOURNAL REPRINT No. HJR-TP-78/A002).
